

SHP2410 Petrol Spray Pump

Extremely powerful, hydraulic, petrol airless spray pump suitable for commercial and fine finish applications.

strictly superior

Mobile

Weighing 55 kg the SHP2410 is a completely portable unit complete with petrol driven motor.

The SHP2410 petrol spray pump has proven to be an extremely powerful and advantageous hydraulic unit. Pressure is controlled by a single operating switch. Slow stroking hydraulics deliver a smooth output and can be easily maintained and repaired. It's durable Honda motor can be operated at variable speeds.

Versatile

Spraying up to 10 litre/min allows a wide range of airless spray tips.

Durable

Fluid section driven by slow stroking hydraulics. Oil is air-cooled.

Cotton Braided Airless Paint Hose

High pressure airless paint hose ideal for petrol and electric spray pumps. Supplied in lengths of 15m.

Safety factor 4:1

1/4 = 430bar

3/8 = 350bar

1/2 = 240bar

Applications:

- Protective coatings
- Water paint, high & low viscosity paint
- Commercial building external wall

Specifications

Power	6.0 HP
Maximum operation pressure	230 bar
Maximum flow volume	10 litre/min
Maximum flow support nozzle	0.051 inch
Maximum scribing speed	188m/min
Size	1,080 x 800 x 1,400 mm
Weight	55 kg

TriTech T360 Spray Gun

Max working pressure: 245 bar

The T360 is a high quality spray gun that is lightweight and balanced. Made from quality aluminium and stainless steel it has proven to be strong, durable and reliable.

Advantages	
Positive shut -off	Reduced hand fatigue
Superior design	1/4NPT inlet ports
In-hand filter (easy access)	Light weight
Built-in hose swivel	2 or 4 finger trigger
Lockable trigger	Wide range of spray tips

Contractor's Airless Spray Tips

Max working pressure: 345 bar

Longest lasting, highest quality tip and guard available to today's professional painter. Trittech's series of contractors spray tips includes 122 different fan pattern / orifice size combinations.

- Patented seal alignment for quick and accurate installation
- Mega-hard tungsten carbide for long duty life
- Tip size tag for quick and accurate size identification
- Tip ring feature allows you to store tips on a belt clip or hook

Road Marking Sharp Liner Airless Spray Tips

Max working pressure: 345 bar

The T-93R Sharp Liner is a tip designed for line striping roads, parking lots, airports, athletic fields and interior floors of industrial warehouses. The spray pattern is designed to give sharp distinct lines with minimal overspray. TriTech's unique manufacturing processes results in a precise fan width and flow rate which is unmatched in the industry. The TriTech Sharp Liner reversible and flat striping tips can be used on any airless line striping machine.

- Patented seal alignment for quick and accurate installation
- Mega-hard tungsten carbide for long duty life
- Tip size tag for quick and accurate size identification
- Tip ring feature allows you to store tips on a belt clip or hook
